

Student's Guide to Borrowing Levels by Major

When you're reviewing your financial aid award letter and applying for a loan, think about the total amount of money you will borrow for all your years in college and especially how that total loan amount will relate to your expected starting salary.

Find your major and the associated average starting salary earned by graduates with a bachelor's degree in that specific college major¹. If your major is not listed, the one that is the most similar to your chosen major will give you a good estimate. Your average starting salary is equivalent to the maximum recommended borrowing for a four-year degree.
